Note – Foundation core subjects:
The foundation core subjects give you knowledge of the areas of:

- Information Systems – ISYS90026 Fundamentals of Information Systems – 1
- Organisational Processes – ISYS90081 Organisational Processes – 1&2
- Database – INFO90002 Database Systems & Info Modelling – 1&2
- Programming – ISYS90088 Introduction to Application Development – 2

The foundation subjects studied depend upon your experience and your prior knowledge so that after completing the foundation studies you are grounded in these areas. You must do the foundation subjects in your first year of study.

Students showing past expertise in subjects may be able to replace them with electives. For instance, if you have already studied database then INFO90002 will be replaced by an elective in your course. This should already have been assessed as part of the application process. If you haven’t been given exemptions to subjects that you think you should have been, send an email (including your degree transcripts AND STUDENT ID to Sean) stating exactly what you require.

¹ If you have already worked in industry, especially as a consultant you may be able to get an exemption from this subject, email the course coordinator to discuss.
